PROFESSIONAL SUMMARY

BS Information Technology graduate with hands-on experience in full-stack web development, software development, IoT systems, and UI/UX design. Completed a Web Developer Internship at Highly Succeed Inc., where I independently designed, developed, and deployed a Human Resource Information System (HRIS) using JavaScript, TypeScript, Node.js, and Supabase. Skilled in building scalable web applications, database management, authentication systems, and responsive solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: HTML5, CSS3
Backend: Node.js
Database: Supabase, PostgreSQL
Tools: Git, GitHub, VS Code, Vercel, Figma, Canva
Concepts: REST APIs, Authentication, CRUD Operations, Responsive Design
Core Technologies: JavaScript, TypeScript, Node.js, Supabase, PostgreSQL, Git, REST APIs

PROFESSIONAL EXPERIENCE

Highly Succeed Inc. | Web Developer Intern | Mandaluyong City, Philippines
February 16, 2026 – May 13, 2026

- Independently designed, developed, tested, and deployed a Human Resource Information System (HRIS) as a solo project.
- Built the application using JavaScript, Typescript, Node.js, and Supabase.
- Implemented authentication, employee management, and database-driven workflows.
- Managed database design, CRUD operations, and system functionality.
- Deployed and maintained the application on Vercel.
- Collaborated with supervisor and teammates and colleagues to gather requirements and implement improvements.

PROJECTS EXPERIENCE

All projects were completed as part of academic and group coursework.

TrickyPay – Smart Transportation Management System <i>Role: Mobile & IoT Application Developer (Team Project)</i> Daet, Camarines Norte	January – December 2025
- Assisted in developing a smart transportation management system as part of a group project - Contributed to the mobile application and IoT-enabled fare collection device - Automated fare computation, payment processing, and accurate change dispensing - Reduced manual transaction errors and improved operational monitoring for TRU and PSTMU	
Autonomous Egg Quality Sorting System Using IoT & Image Processing <i>Role: IoT Developer (Team Project)</i>	February – December 2024
- Participated in building an IoT-powered egg sorting system using Raspberry Pi and image processing - Classified duck eggs based on size, quality, and shape for consistent grading - Automated the sorting process to reduce manual labor and human error - Assisted in implementing real-time monitoring and data logging to support inventory management	
Cam Commute Guru – Tricycle Commuter Safety & Fare Assistance App <i>Role: UI/UX Designer (Academic Project)</i> Camarines Norte	November – December 2023
- Designed the user interface and user experience for a mobile application focused on safer tricycle commuting - Implemented QR code scanning to verify driver and vehicle information - Designed a fare calculator to promote fair pricing and prevent overcharging - Created a secure incident reporting feature to help commuters contact proper authorities quickly	

EDUCATION

University of Camarines Norte State

Bachelor of Science in Information Technology

Graduated: June 2026

AWARDS AND RECOGNITION

Best in Capstone Project June 26, 2026

- Awarded Best in Capstone Project for "TricyPay – Smart Transportation Management System."
- Contributed as Mobile & IoT Application Developer in developing a smart transportation management system integrating mobile application and IoT technologies.
- The project focused on fare automation, payment processing, and operational monitoring for local transportation organizations.

Special Citation for Research Publication June 26, 2026

- Agent-Based Simulation and GIS Mapping of Tuberculosis Transmission: A Case Study in Daet, Camarines Norte.
- Published in Zenodo.

Certificates

Cisco Networking Basics (2024)

Technical Support Fundamentals – Coursera (2024)

BITSCON 2024

From Scroll to Skill – ICT Council (2025)
